

We are hiring!

Production Technician

Introduction

Do you want to work for a company which makes the coolest high-tech electronics in the world utilizing nanotechnology? A company that invests heavily in creating a unique work environment for its employees? A company with diversity and competence you will have a hard time finding anywhere else? Do you want to be a part of our team? Then you should keep reading.

About Low Noise Factory

Low Noise Factory (LNF) designs and produces the world's best low noise microwave amplifiers. These amplifiers are used near absolute zero –cryogenic– temperatures for space exploration, quantum computing, radio astronomy, and for various ground-breaking scientific endeavors where extreme sensitivity is paramount. Our amplifiers help receive signals from the most distant man-made object from Earth, the Voyager 1 space probe, help read quantum states in the fastest quantum computers, and help make MRI scanners work in medical institutions. Low Noise Factory's state-of-the-art amplifiers are far ahead of the competition. We invest heavily in research and collaborate closely with academic and scientific communities to keep advancing our technology further and further. Our success is the result of passion for science and precision, advanced by devotion and curiosity. As explorers on the technological frontier, our aim is to keep making the impossible possible. We do everything from basic research to product development, production, and testing. In our 1000 sqm facility in Gothenburg, we work in state-of-the-art laboratories; from electronics assembly labs to high frequency cryogenic testing. In addition, we have access to advanced cleanrooms where we develop and produce our semiconductor circuits. LNF has today 19 employees with a background from 12 different countries.

Job description

We are currently looking to expand Production department with Production Technician. The Production Technician will assemble, test and package our products to increase the production capacity. All training for the position is done in-house.

Qualifications

- Very stable hands and fine motor skills
- Strives for quality and perfection
- Reliable and responsible
- Ability to take instructions
- Social ability
- Patient and persistent - the job involves microscope work for longer periods of time
- Thorough and careful
- Attentive and have a feeling for details
- Ability to work with deadlines

- Willingness to contribute
- Good level of English

Valuable additional skills

- Knowledge of Office programs
- Interested in electronics and technology

Workplace

The position is full time and located at the Low Noise Factory main office at Nellickevägen 24, Gothenburg, Sweden
