

We are hiring!

## Production Technician

### Introduction

Do you want to work for a company which makes the coolest high-tech electronics in the world utilizing nanotechnology? A company that invests heavily in creating a unique work environment for its employees. A company with diversity and competence you will have a hard time finding anywhere else. Do you want to be a part of our team? Then you should keep reading.

### About Low Noise Factory

LNF was founded in 2005 as a spin-off from Chalmers University of Technology. The company is making cryogenic low noise amplifiers cooled down to -269C. The applications include Quantum Computers, Radio Astronomy, Search for Extraterrestrial Intelligence, Communication and Medical. We do everything from basic research in collaboration with the best universities, to product development, production, testing and sales in our 1500 m2 office in Gothenburg. The amplifiers we build are matchbox sized metallic boxes with the absolutely latest technology inside. There are features inside the amplifiers controlled to atom level precision to achieve the best performance.

### Job description

We are looking for a **micro assembler** for our Production team! The Production Technician will assemble, test and package our products to increase the production capacity. All training for the position is done in-house. Starting date ASAP.

### Requirements and qualifications

- Very stable hands and fine motor skills
- Strives for quality and perfection
- Reliable and responsible
- Willingness to contribute
- Good level of English
- Ability to take instructions
- Social ability
- Patient and persistent - the job involves microscope work for longer periods of time
- Thorough and careful
- Attentive and have a feeling for details
- Ability to work with deadlines
- Positive attitude

## Valuable additional skills

- Knowledge of Office programs
- Interested in electronics and technology

## Workplace

The position is full time and located at the Low Noise Factory main office at Nellickevägen 24, Gothenburg, Sweden

## How to apply

Please send your CV and motivation letter to [sokk@lownoisefactory.com](mailto:sokk@lownoisefactory.com) with the subject "Production Technician".

Your personal skills and willingness are more important than your education and previous work experience.
